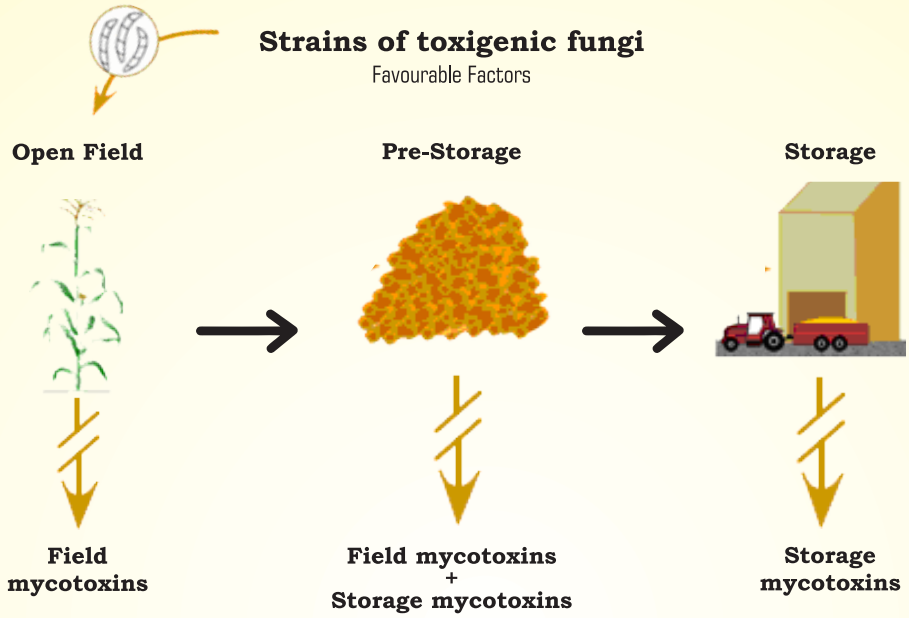
TOXELIM-B™

"An ultimate Liver Supplement that Restores Hepatic Homeostasis"

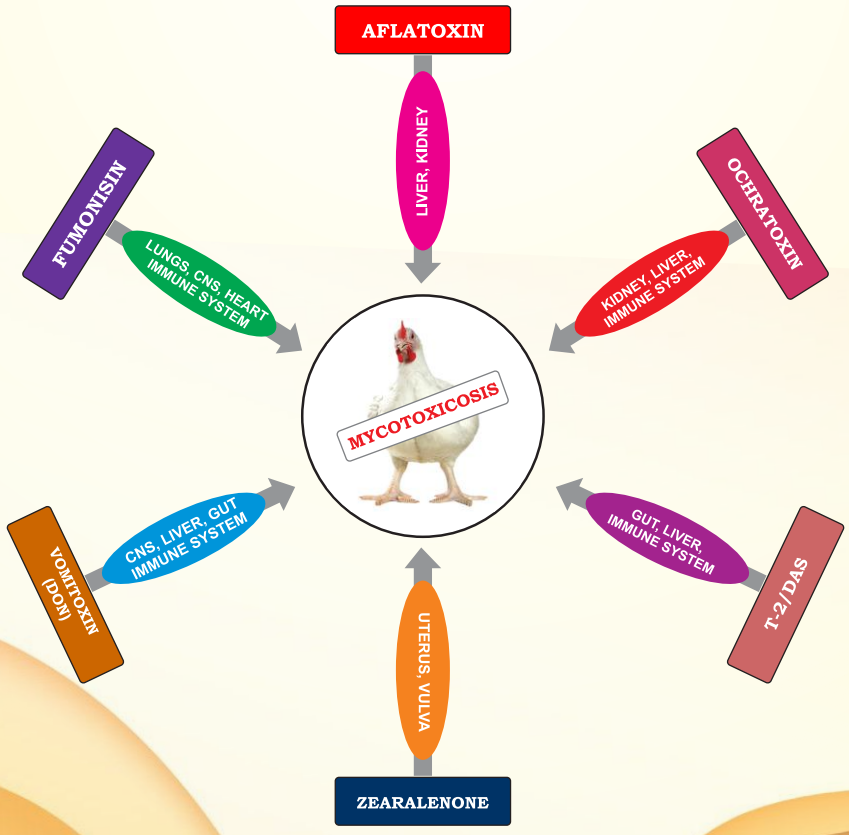
- Mycotoxicosis is an alarming threat for poultry Industry. Mycotoxins effects the normal physiology of animals and render them senstive to diseases. However the effects of mycotoxins may vary considerably from one species to another.
- Mycotoxins are spread through contaminated feeds. More than 80% of the feed samples tested shows positive results for the presence of mycotoxins.

FIELD Vs STORAGE MYCOTOXINS

MYCOTOXICOSIS AN ALARMING THREAT IN POULTRY



TYPES OF MYCOTOXINS & ORGANS EFFECTED



Mycotoxins effects mainly by:

- Reduction of feed intake or feed refusal.
- Alteration in nutrient content of feed in terms of nutrient absorption and metabolism.
- Effects on the endocrine and exocrine systems.
- Suppression of the Immune system.

- Liver is a vital organ that is continuously prone to wear and tear as a result of ongoing process of xenobiotic detoxification.
- TOXELIM-B, a unique composition of Vitamins, Minerals and other important nutrients that support the functions of physiologically vital organs.
- Antioxidants and herbal extracts in TOXELIM-B protects the bird's liver from oxidative stress and hepato cellular degeneration resulting from mycotoxicosis.

Composition of TOXELIM-B :

Liver Extract	Vitamin A acetate
Protein Hydrolysate	Vitamin C
MOS	Vitamin B12
Vitamin D3	Triphala
Vitamin E	Ocimum sanctum
Selenium	Ashwagandha
Biotin	Andographis Paniculata.

Dosage:

Commercial Layers : 500 gm -1 Kg/MT of feed

Broilers & Breeders : 1-1.5 Kg/MT of feed

(Or)

As suggested by the Veterinarian.

Benefits of TOXELIM-B :

- Prevents the effects of mycotoxins in feed.
- Ensures maximum availability of nutrients to birds.
- Improves FCR.
- Restores optimum performance and productivity levels.

25 Kg Triple laminated BOPP bags.
