Bacterial Cell

Membrane Disruption & Leakage of Cytosolic Contents
Precipitation of cellular materials
Destruction of essential gradients

Composition:

Each 100 ml contains:

Didecyl dimethyl ammonium chloride15 g.

Aqueous Base.....Q.S.

Key Benifits:

- ✦ AQUAREMID® is a fast acting biocide with Bactericidal, virucidal, fungicidal and algaecides activities.
- ✦ AQUAREMID® is effective against many gram-negative and gram-positive bacteria, enveloped viruses, fungi, mold, and yeast.
- ✦ AQUAREMID® kills bacteria and viruses by disruption of bacterial cell membrane and virus membrane and there by prevents spread of infections.
- ✦ AQUAREMID® prevents the formation of bio film, kills E.coli strains in the water and makes it potable.
- ✦ AQUAREMID® Provides good surfactant and wetting property with good residual activity.
- ✦ AQUAREMID® Works effectively even in the presence of hard water and varied pH.
- ✦ AQUAREMID® is Very safe disinfectant that doesn't contain additives or impurities that would be of toxicological or environmental concern.
- ✦ AQUAREMID® is an excellent choice of disinfectant to choose in order to avoid excessive antibiotic usage in animals.
- ✦ AQUAREMID® use keeps the animal's environment clean and reduces the chances for infections. This will in turn prevent further antibiotic usage and the occurrence of microbial resistance in animals.

Recommended Usage:

During Disease Out Breaks as spray: 5.0 ml. per litre water.

As water sanitiser 1.0 ml. in 20 litres of water.

For Aquaculture: 2.5 to 5.0 litres in 1 hectare, 1 meter deep pond.

Presentation:

1 Litre & 5 Litres HDPE Containers.
