TOXICLEAN-FS™

"An Eco-friendly approach for Elimination of Obnoxious Gasses "

TOXICLEAN-FS is a unique combination of Zeolites such as HSCAS and Bio actives from Yucca Schidigera extracts that provides high adsorption of toxic substances/noxious gasses present in water and eliminates them from pond environment to support the healthy growth of fish/shrimp.

TOXINS FROM FEED

BACTERIA

FUNGI

VIRUS

HSCAS in TOXICLEAN -FS

- Have Fine Particle Size with High Porosity
- Provides Enhanced Adsorption
- High Ion Exchange Capacity
- Binds & Eliminates feed toxins effectively
- Binds and Eliminates infectious agents

YUCCA SAPONINS

- Improves FCR
- Reduces atmospheric ammonia in confinement
- increases DO levels &
- Reduces BOD and COD.

Key Benefits:

- TOXICLEAN-FS reduces the levels of noxious gases present in the pond and creates healthy environment that supports the growth of aquatic species.
- TOXICLEAN-FS rejuvenates the phytoplankton growth in the pond.
- TOXICLEAN-FS clears pond bottom by adsorbing and removal of wastes, bacteria from pond bottom.
- TOXICLEAN-FS reduces obnoxious gases and provides stress free environment that supports the growth of aquatic organisms.
- TOXICLEAN-FS improves water quality by its high CEC and thereby enhances the healthy growth of fish/shrimp.
- TOXICLEAN-FS is effective even in high ranges of salinity and pH.

Presentation:

Available in powder & Granule forms

Directions for Use:

Thoroughly mix required quantity of product with wet sand and apply over the pond with aeration.

- **For pond preparation :** 50 kg/ hec.
- **For use during culture period :** 10 - 20 kg/hec. depending on water depth in pond.
