GENTOSIL™

(GENTAMICIN INJECTION)

GENTOSIL™ is a Gentamicin Sulfate based aminoglycoside antibiotic injection used in the treatment of infections caused by several Gram-negative microorganisms such as E.coli, Salmonella spp., Klebsiella spp., Shigella spp., Proteus spp, Pseudomonas strains and some Gram-positive microorganisms including Staphylococci, Corynebacteria spp, and Mycoplasma spp.

GENTOSIL™

(GENTAMICIN INJECTION)

Composition: Each ml contains:

- ♦ Gentamicin Sulphate IP equivalent to Gentamicin 40 mg
- ♦ Methyl paraben IP 0.18 % w/v
- ♦ Propyl paraben IP 0.025 % w/v
- ♦ Water for Injection IP q.s

Mode of Action: Each ml contains:

Gentamicin in GENTOSIL™ is an aminoglycoside antibiotic, it exerts its bactericidal action by targeting the bacterial ribosomes, specifically the 30S subunit, thus interfering with protein synthesis mechanisms. This disruption in protein synthesis especially during the step of mRNA translation, leads to the formation of truncated or non-functional proteins, which are in turn placed at the cell wall, compromising cell's impermeability leading to cellular leakage and cell death.

Indications:

GENTOSIL™ is active against the gram-negative and gram-positive microorganisms and indicated for the treatment of respiratory, gastrointestinal and urogenital infections (bronchitis, pneumonia, pyelonephritis, cystitis, urethritis, endometritis, colibacillosis, salmonellosis, infected wounds, pyoderma sepsis, etc.), caused by gentamicin-sensitive microorganisms in poultry. This antibiotic may be used to prevent the development of drug-resistant bacteria.

Key Benefits:

- ♦ GENTOSIL™ is effective against a variety of gram negative and some of gram positive bacteria and helps in the treatment of a variety of infections.
- ♦ GENTOSIL™ is effective in the treatment of respiratory tract Infections (Bronchitis, Pneumonia, Bronchopneumonia) and GI Tract Infections (Peritonitis, Diarrhoea, Enteritis)
- ♦ GENTOSIL™ is also effective in the treatment of Urogenital Tract Infections (Intrauterine infections, Endometritis, Pyometra, Cervicitis, Metritis)
- ♦ GENTOSIL™ is effective in the treatment of Skin & Soft Tissue Infections (Mastitis, Dermatitis, septicemic infections and infections of bones and joints.

Dosage:

5 - 5.5 mg/kg B.wt. or as suggested by veterinarian.
