# HALINOL-60

Halquinol - 60%

HALINOL-60 is a Halquinol (Chlorinated derivatives of 8 hydroxy quinoline) based Non-Antibiotic growth promoter. The bioactive alkaloids in HALINOL-60 have a quinolone ring in its parent nucleus and hence exhibit extensive pharmacological activity. HALINOL-60 is therefore widely used in the prevention and treatment of gastrointestinal bacterial infections caused by gram positive and gram negative bacteria, protozoan and fungal infections.

# HALINOL-60

## Halquinol - 60%

### Composition:

Each kg contains 600 g of Halquinol which is a combination of three chlorinated oxines: 5, 7-dichloro 8-Hydroxyquinoline, 7-chloro 8-Hydroxyquinoline, 5-chloro 8-Hydroxyquinoline.

### Indications:

- ✦ Helps in the control and prevention of microbial infections of gastro intestinal tract.
- ✦ Acts as a growth promoter and helps in the treatment of wet droppings.
- ✦ HALINOL -60, slows down intestinal peristalsis; increases absorption of nutrients and water; improves feed conversion rate, and promotes growth of animals.
- ✦ Helps in the control and prevention of Crop mycosis.

### Key Benefits:

- ★ An excellent feed additive and an effective Non-Antibiotic Growth Promoter.
- ✦ Effective in control of microbial infections of gastro intestinal tract.
- ✦ Gut acting and does not get absorbed from intestine, hence nontoxic and leaves no residues.
- ✦ Non-specifically reduces the tone and motility of the intestine which in turn reduces the movement of food through GIT, allowing complete digestion and absorption of Nutrients.
- ✦ Controls non-specific diarrhoea
- ✦ Prevents crop mycosis & wet droppings.
- ✦ Acts as a superior antibiotic growth promoter, when compared to Zinc bacitracin, Virginiamycin or Tylosin etc.,
- ✦ Improves weight gain, and reduces mortality in birds.
- ✦ Improves FCR and Productivity.

### Directions for Use:

As a Growth Promoter: 50-100 g / ton of feed.

For the treatment of Infections: 200 g / ton of feed.

**Presentation: 10 kg**
