

Composition	Each 10 ml of <i>ERYTHROBOON</i> contains
Ferric Ammonium Citrate	1430 mg
Folic Acid	2 mg
Tricholine Citrate	100 mg
Calcium Lactate	250 mg
Biotin	200 mcg.
Vitamin B2	2 mg
Niacinamide	150 mg
D Panthenol	2 mg
Vitamin B6	2 mg
Vitamin B12	100 mcg.
Vitamin C	10 mg
Vitamin D3	5500 I.U.

Composition	Each 10 ml of <i>ERYTHROBOON</i> contains
Vitamin E	22 mg
Copper Sulphate	120 mg
Cobalt Chloride	5 mg
Zinc Sulphate	15 mg
L-Lysine	10 mg
DL-Methionine	5 mg
Protein Hydrolysate	100 mg.
Selenium	10 mg
Inositol	5 mg
Malt Extract	2.2 gms
Preservatives	Q.S

Benefits of *ERYTHROBOON* :

- ➔ Offers supportive therapy for CAV
- ➔ Stimulates bone marrow to form RBC
- ➔ Improves Haemoglobin levels in blood
- ➔ Acts as a hepato protectant and stimulates liver
- ➔ Prevents anaemic condition
- ➔ Provides energy instantaneously
- ➔ Relieves stress and boosts up the immunity
- ➔ Improves weight gain and FCR

Mixing Ratio :

- Chicks: 5 ml for 1000 birds for 5 to 7 days
- Growers, Broilers & Layers: 5 ml for 100 birds for week a month
- Breeders: 10-15 ml for 100 birds for week a month
- Sheep, Goat and Calves: 5-10 ml for 2-3 days
- Cattle-25 ml for 2-3 days

(Or)

As suggested by the Veterinarian.

Presentation:

1 Liter & 5 Liters HDPE containers.

RR VETERINARY
HEALTH CARE PVT. LTD.

An ISO 9001:2015 Certified Company

#4-122/1/1, Plot no. 115 & 123, Kuntloor Village, Abdullapurmet Mandal,
R R Dist - 501 505, Telangana, INDIA.

**STOP COLLOSAL LOSSES IN
POULTRY & LIVESTOCK WITH**

***ERYTHROBOON*[®]**

***ERYTHROBOON*[®]**

"An excellent haematinic that uplifts birds health"

IRON Plays a Central Role in Oxygen Transport by RBC

Haemoglobin is a globular protein made up of 4 peptide chains and each chain contains one HAEM group that can combine with one oxygen molecule. Oxygen gets loaded onto the haemoglobin molecules in lungs while it gets unloaded in body tissues.

ANAEMIA

Insufficient supply of Healthy RBC needed for oxygen supply to the Body

CAUSES

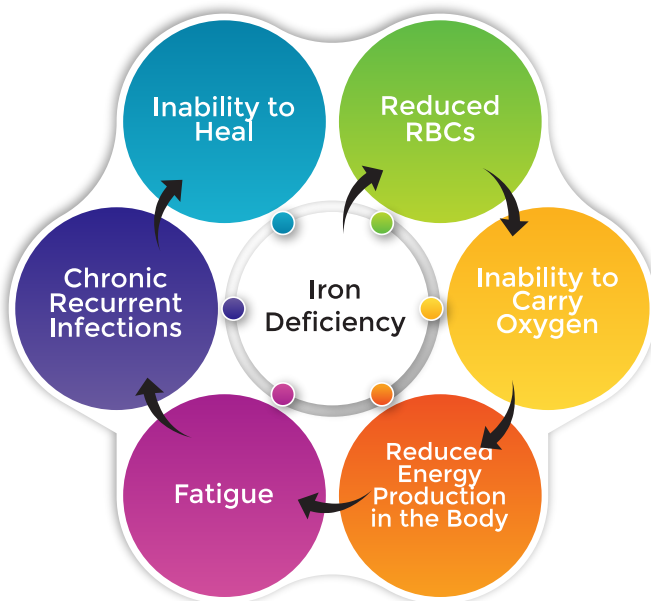

Iron Deficiency
Vitamin Deficiency
Chronic Diseases
Toxicosis
BM Dysfunction
Heamolysis

SYMPTOMS

Fatigue
Hypoxia
Pallor
Irregular/ Fast Heart Beat
Bleeding Tendencies

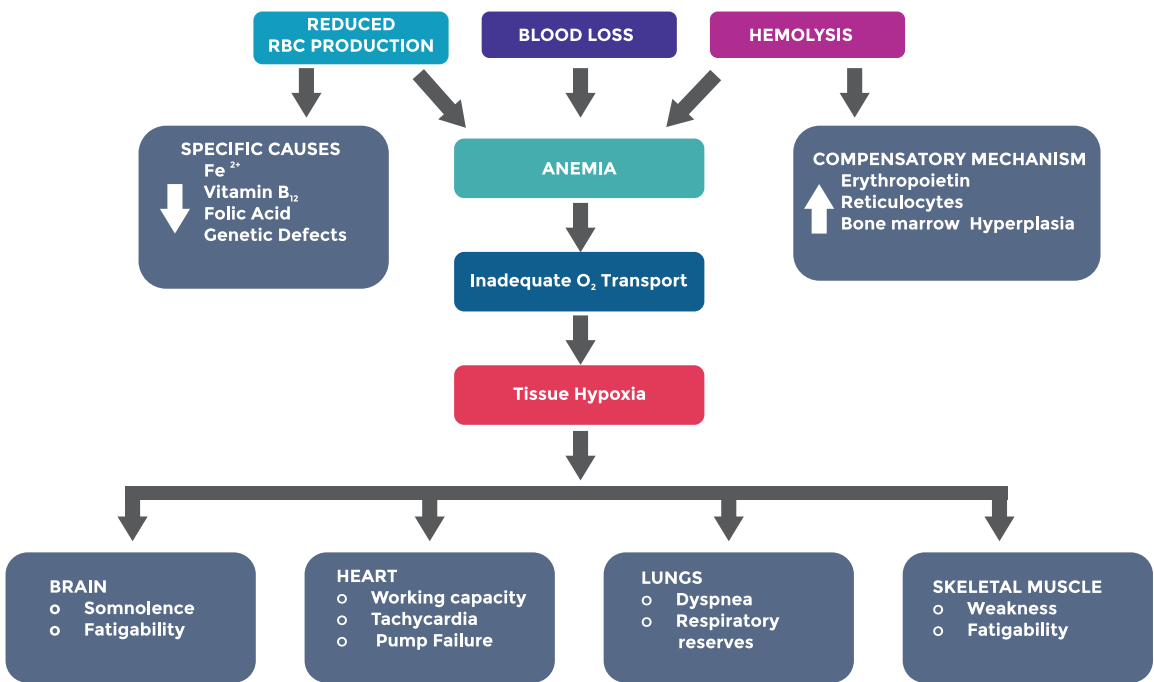

Anaemia an Alarming condition in poultry that may be devastating

Anaemia A Disease of Progressive Iron Depletion with cascade of events bad to worse:

What makes birds to suffer from Anaemia ??

Anaemia a Pathological Overview:

ERYTHROBOON®
“Never lets your flock down”

Elements of **ERYTHROBOON** that helps the bird to circumvent Anaemia

IRON

IRON is essential for production of RBC, which help store and carry oxygen in the blood. Iron deficiency results in reduction in RBC # & Hypoxia.

B 12 VITAMIN

B12 deficiency leads to production of abnormally large RBC (MACROCYTIC) that are rapidly destroyed and not useful for oxygen transport.

B 9 VITAMIN

Vitamin B 9 (FOLATE) works closely with vitamin B12 in production of RBC and help iron work properly in the body. Deficiency of B9 results in immature RBC.

HGF

Bioactives in **ERYTHROBOON** supports the biosynthesis of Hematopoietic Growth Factors (HGFs) that inturn controls maturation & differentiation of Blood Cells. E.g., Erythropoietin, G-CSFs, GM-CSF, IL-11 etc.
