

Cypermethrin-High Cis Emulsifiable Concentrate

FREALL-D is a synthetic, broad spectrum natural pyrethrin based INSECTICIDE, which rapidly act on insect nervous system and paralyze them by giving a quick knockdown effect.

COMPOSITION:

Contains Deltamethrin 5% w/v solvent and emulsifiers q.s.

RR VETERINARY
HEALTH CARE PVT. LTD.

MODE OF ACTION:

The toxicity of Deltamethrin originates in higher nerve centers of the brain. Deltamethrin paralyzes the nervous system of insect, leading to eventual death. Insects absorb, quickly metabolize, and are poisoned by the compound, through both oral and dermal means. Death of insects is due to irreversible damage to the nervous system, occurring when poisoning lasts more than a few hours.

INDICATIONS:

To control infestation of flies, fleas, insects, mites (red poultry mite, Northern fowl mite) ticks, louse (fluff louse, Depluming louse) mosquitoes in poultry, cattle, sheep, goat, horses, camels, poultry dogs and farm houses.

DIRECTIONS FOR USE:

Poultry: Prepare a solution of 1gm per litre and spray on whole body. Use 50-60 litres of this spray mixture for 1000 birds.

Dogs: Prepare a solution of 1gm per litre and spray on whole body.

Sheep: Prepare a solution of 1gm per litre and spray on whole body.

Presentation: 1 Litre HDPE Containers.
