IBD | VVND | CRD/CCRD | Infectious coryza | Ranikhet / ND
Brooders Pneumonia | Marek's Disease | Fowl Pox

Composition:

Potassium Monopersulphate Compound (Containing Triple Salt -Potassium Monopersulphate Potassium Hydrogen Sulphate & Potassium Sulphate)	49.8% w/w
Sodium Chloride	1.5% w/w
Buffer & Excipients	Q.S. to 100%
Colour	FD & C Yellow No. 5(-)

Indications:

Best used for disinfection of

- Poultry farms
- Hatcheries
- Egg inventory rooms
- Foot dips
- Vehicle dips
- Cattle sheds
- Horse stables
- Nests
- Kennels & equipments

Benefits:

- **MICROKILL** is an Eco safe & effective chemical disinfectant with broad spectrum activity against Bacteria (Gram Positive & Gram Negative) Viruses (Enveloped & Non-Enveloped), Fungi and all other Protozoal forms.
- **MICROKILL** actively penetrates into both Organic and Inorganic Biofilms and kills harmful microbes.
- **MICROKILL** works effectively even at low temperatures and in the presence of organic matter.
- **MICROKILL** is a best in class disinfectant that inactivates all the three lines of defence mechanisms executed by bacteria namely, biofilms, cell wall, cell membrane and the encased efflux pump level and alteration of target sites, regulation of gene expression and production of certain enzymes.
- **MICROKILL** is a Non toxic and Non-irritant disinfectant at user dilutions that is safe to use even in the presence of birds.
- **MICROKILL** provides longer residual effect.
- **MICROKILL** is an effective surface and water disinfectant.
- **MICROKILL** is effective in control of secondary and super infections during sudden disease outbreaks in birds.
